

Instruction for use

1. Manufacturer:

Kabeltec GmbH
Werkstraße 43
78727 Oberndorf am Neckar
Deutschland

2. Product:

Solarkabel H1Z2Z2

Solar cable is intended for use in photovoltaic systems (PV systems) and ensures reliable energy transmission from solar modules to inverters or other system components. The cable is made of materials that are resistant to external influences such as UV radiation, temperature and moisture, making it ideal for outdoor use. It has robust insulation, which ensures the safety and durability of the system. The cable is routed from the solar modules to other system components and ensures efficient energy transmission over long distances.

As this is electrical equipment, we strongly recommend that installation is only carried out by qualified personnel to ensure safety and prevent possible damage.
