

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany

2. Product: Network Cable Connector Outdoor IP68

Connector is used to connect two network cables outdoors where protection from moisture and dust is required. It is needed to create a reliable connection, for example when extending or repairing a cable. The cables are inserted into the connector's ports, which fix them and create a stable connection. Such a solution is suitable for outdoor networks where stability is important even in difficult weather conditions. The connector can be used in private and professional networks where a protected cable connection is required.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
