

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: RJ45 AND Coupling

Adapter is used to connect two network cables with RJ45 connectors, for example to extend an existing cable. It is needed when the distance between devices in the network needs to be increased without replacing the entire cable. The cables are plugged into the adapter's connectors on both sides, creating a stable and reliable connection. Such an adapter is convenient for situations where a temporary or permanent extension of the cable is required. It is suitable for use at home or in the office where a stable network connection is important.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
