

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: hb-digital Abisolierer

Wire stripper is designed for stripping various types of cables such as coaxial, network and antenna cables. It is equipped with three attachments suitable for cables of different diameters, which allows precise and fast insulation without damaging the conductor. The device offers comfortable and safe use thanks to the ergonomic handle and easy handling. It is used to prepare cables before connection in network and antenna systems. To use the tool, simply insert the cable into the appropriate connector, set the correct diameter and gently rotate the tool along the cable to remove the insulation.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
