

instructions for use

1. Manufacturer:

HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany

2. Product:

hb-digital CAT 6a network socket without cover

LAN connector is used for connecting RJ45 cables in hidden wiring systems. It is designed for installation in standard mounting boxes in walls or other building elements and provides connection of conductors for data transmission. Installation is carried out by connecting the wires to the contacts of the connector and inserting the connector into the box. It is used in situations where hidden wiring in walls is required to ensure a stable connection for network devices. This connector is suitable for building high-bandwidth networks and is used in office and home installations.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
