

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: hb-digital crimping pliers for solar connectors

Crimping pliers are designed for working with solar connectors and cables in photovoltaic systems. It is used to securely connect the wires to the connectors and ensure a stable electrical connection. The tool allows for precise crimping of the connectors to the cables, which is important to prevent signal loss and increase the efficiency of the system. The crimping jaws of the pliers are suitable for various cable types, including those used in solar panels, making the tool versatile. It enables quick and high-quality connection of solar connectors, which speeds up the installation process. The crimping pliers are designed for creating reliable connections in systems where durability and safety are required.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
