

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: hb-digital underground cables for solar systems

Power cable NYY-J is used for connecting devices in electrical systems, including solar systems. The cable has robust insulation that protects it from external influences such as mechanical damage, moisture and temperature fluctuations. It is suitable for use in high-current systems and ensures reliable energy transfer between components. The cable with a cross-section of 16 mm² is designed to provide stable currents and is an ideal choice for use in power supply systems such as solar panels and other systems that require a safe and efficient connection. The cable is laid from the solar panels to other system components to ensure energy transfer.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
