

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany

2. Product: hb-digital cable entry with brush strip

Cable grommet is used to route cables through the front panel of a server cabinet. It helps organize the cables and prevents them from getting tangled while keeping dust out. The brush insert allows the cables to be easily routed while providing a dust-tight seal. Installation consists of mounting the bar into the rack and running the cables through. This device is used in places where neat and secure cable routing is required.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
