

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany

2. Product: hb-digital cable gland

Cable gland is used to tightly fix cables in openings. It protects the cables from external influences such as moisture and dust and ensures a reliable connection to the equipment. The gland is installed by screwing it into the hole through which the cable passes and provides a secure fixation. It is used to organize wiring in equipment or enclosures where protection of connections and tightness are required.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
