

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany
2. Product: hb-digital LSA connection box

LSA module is used to connect and extend Cat 7 class network cables. It is inserted into an appropriate mounting box or panel and allows the connection of conductors via LSA terminals. To install the module, the cable must simply be inserted into the terminal contacts, which automatically capture the wires and create a reliable electrical connection without the need for additional tools. The module is suitable for extending existing network connections or connecting new devices within a cabling system. It is used in cable panels, boxes or junction boxes.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
