

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: hb-digital Patchkabel CAT 8.1

LAN cable CAT 8.1 is used for high-speed data transmission in heavily loaded networks. It has a flat design that allows the cable to be laid in tight spaces and used in areas with high transmission speed requirements. The cable is equipped with shielded conductors (U-FTP) that reduce external interference and improve signal stability. The LSZH sheath reduces smoke and toxic gas emissions in the event of a fire and ensures safety. It is suitable for use in offices, data centers and other areas where high performance and reliable connections are required.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
