

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany
2. Product: hb-digital rack panel for network cabinet

Bezel is used to close empty spaces in a server rack. It helps prevent dust from entering and improves the appearance of the equipment. Installation consists in simply fixing the bezel in the rack and filling the empty space. This device is used to keep order in server racks and prevent dust accumulation. The bezel is suitable for standard racks where empty spaces need to be closed.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
