

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany

2. Product: hb-digital solar panel

Solar panel is used to convert solar energy into electrical energy that can be used to power appliances or feed into the grid. It is installed on the roof or balcony where it can effectively collect sunlight. After installation, the panel is connected to the system and starts generating electricity that can be used to save on electricity bills or for self-consumption. This solution is suitable for use in residential or commercial facilities that have access to sunlight.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
