

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany

2. Product: hb-digital solar plug distributor type T

Solar connector splitter is designed to connect multiple solar modules in photovoltaic (PV) systems. It is used to distribute the energy from multiple modules to an inverter or other system components. The splitter has multiple input ports so that multiple cables can be connected to ensure efficient power distribution. The splitter is installed by connecting cables with solar connectors, which allows for quick and easy system expansion. This splitter is ideal for use in solar systems where multiple modules need to be connected for optimal energy transfer.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
