

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany
2. Product: hb-digital solar connector distributor type Y

Splitter is used to connect multiple solar modules in a system. It allows two solar cables to be merged into one, which simplifies the connection of multiple modules. The splitter is used to transfer power from the modules to an inverter or other devices in the system. Installation is done by connecting the cables with connectors, and the splitter is ready for use. It is used in solar systems where multiple modules need to be connected.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
