

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany
2. Product: hb-digital solar plug

Set of solar connectors is used to connect solar modules to other system components such as inverters or batteries. The connectors ensure a tight seal and protection against external influences such as dust, moisture and mechanical damage, which is crucial for the durability and reliability of the connections in solar systems. They are used to create reliable and safe electrical connections that ensure a long service life in outdoor use. The installation of the connectors is simple and does not require any special tools, which speeds up the assembly process. The connectors ensure stable energy transfer between the system components, minimize losses and improve the efficiency of the entire solar system. They are compatible with different cable types, making them versatile and practical for different solar installation configurations.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
