

## instructions for use

1. Manufacturer: HB-DIGITAL GmbH  
Wahlerstr. 16  
40472 Düsseldorf  
Germany
2. Product: hb-digital power strip

Power strip is used to connect multiple devices in one place, such as in a server rack. It has four power outlets that allow multiple devices to be connected at the same time. Installation is simple: the power strip is fixed in the rack and the power cables of the devices are connected. This device helps to manage the power supply for multiple devices at a central point. The power strip is used in places where multiple devices need to be connected but space is limited.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
