

instructions for use

1. Manufacturer: HB-DIGITAL GmbH
Wahlerstr. 16
40472 Düsseldorf
Germany

2. Product: hb-digital Cable CAT 7a

CAT 7a network cable is designed for high-speed data transmission and is used in installations where maximum bandwidth is required. It is equipped with shielded conductors (S-FTP) that reduce electromagnetic interference and improve signal quality. The cable offers a high frequency bandwidth, which makes it suitable for data transmission over long distances without loss of quality. It also has an LSZH (Low Smoke Zero Halogen) jacket, which minimizes the amount of smoke and toxic gases in the event of a fire, thus increasing safety. The cable is ideal for use in offices, data centers and other professional network installations.

Since this is electrical equipment, we strongly recommend that installation be carried out only by qualified personnel to ensure safety and avoid possible damage.
